

Yana Diachok

Front-end React Developer

 Vinnytsia, Ukraine (Remote)  +380986629945  cerahuk2023@gmail.com  [Yana-Diachok](#)  [Yana-Dyachok](#)  [@yana_ins](#)

Professional Profile

Frontend Developer with a strong technical background in building scalable, high-performance web applications and responsive landing pages. Experienced in React, TypeScript, Next.js, and modern state management techniques.

Education

- The Rolling Scope School
 - Node.js Developer (Sept. 2024 – Dec. 2024) [certificate](#)
 - React Developer (July 2024 – Sept. 2024) [certificate](#)
 - JavaScript/Front-End Developer (Nov. 2023 – June 2024) [certificate](#)
- IT-Step Academy (2021 – 2022)
- National Pirogov Memorial Medical University (2011 – 2019)

Experience

- Trainee React Developer (July 2024 - Sept. 2024)
(The Rolling Scope School)
 - Created a React app with integrated Redux Toolkit and RTK Query to optimize API calls and enable efficient data caching. Migrated the application from Vite to Next.js for server-side rendering and later adapted it for Remix integration to enhance routing and SSR capabilities.
 - Developed a lightweight hybrid of Postman and GraphiQL, supporting REST methods, GraphQL requests, authentication, and request history. Collaborated in a team of three, leading key aspects of development and ensuring seamless user experience.
- Trainee Front-end Developer (March 2024 - June 2024)
(The Rolling Scope School)
 - Developed an interesting single page application (SPA) for a drag racing control system ("Async Race") that allows users to control car engines and analyze race statistics. CRUD operations used
 - Created "RSS Puzzle", an interactive language-learning mini-game. Designed a gameplay experience that allows users to assemble sentences from jumbled words.
 - Developed "Fun Chat", a real-time chat application leveraging WebSocket protocol for bidirectional communication between client and server.
 - Was part of the development team that created a responsive eCommerce SPA with user authentication, product cataloging, dynamic product pages, and a shopping cart with CommerceTools API integration.

Projects

- Async Race (CRUD operations)
Tech: React, TypeScript, Vite, Material UI, Redux, SCSS, Styled Components, ESLint, Prettier, Husky [Demo \(need server\)](#) | [GitHub Code](#)
- REST/GraphiQL Client
Tech: React, TypeScript, Vite, Remix, Material UI, Styled Components, ESLint, Prettier, Husky, Vitest, Team work [Demo](#) | [GitHub Code](#)
- React app
Tech: React, TypeScript, Context API, RTK Query, Redux Toolkit, Next.js, Remix, Styled Components, Jest, Vite, ESLint, Prettier, Husky [Demo](#) | [GitHub Code](#)
- React forms
Tech: React Hook Form, Yup, Redux Toolkit, React Router, Styled Components, TypeScript, SCSS, Vite, ESLint, Prettier, Husky [Demo](#) | [GitHub Code](#)
- eCommerce-Application
Tech: React, TypeScript, SCSS, Material UI, Styled Components, Vite, ESLint, Prettier, Husky, Team work [Demo](#) | [GitHub Code](#)

Hard Skills

- Markup & Styling: HTML5, CSS3, SASS/SCSS, BEM
- Languages: JavaScript (ES6+), TypeScript, C++ (Basic, OOP)
- Frameworks & Libraries: React, Next.js, NestJS, Redux Toolkit, React Hook Form, Material UI, Styled Components, Tailwind CSS
- State Management: Redux Toolkit, Context API
- APIs & Backend: REST API, GraphQL, Axios, Firebase, WebSocket
- Tools & Platforms: : Git, GitHub, Node.js, Docker, Webpack, Vite, ESLint, Prettier, Husky
- Software Architecture: SOLID principles, Data Load Balancing, Sorting Algorithms
- Design and Prototyping: Figma(for web development), Trello
- Testing: Jest, Vitest

Soft Skills

- Quick Learner, Team Player, Problem-Solving, Attention to Detail, Strong Communication, Adaptability & Self-Motivation

Languages

- Ukrainian (native)
- English B2 (in progress)
[certificate](#)
- German A1 (in progress)
[certificate](#)
